

Diana Liu

lxjiao0805@gmail.com | 202.739.1368

Summary

Proficient in mathematical statistics, econometrics, machine learning and deep learning. Offering 15 years of extensive project management expertise with a deep involvement in experimental design, data integration and cleansing, feature engineering, as well as mastery in machine learning, optimization, and deep learning implementations. With extensive experience in leveraging advanced AI technologies, I have successfully utilized prompt engineering, Retrieval-Augmented Generation (RAG), and agents to develop robust applications that address complex business challenges, automate processes, and drive business growth.

Work Experience

AI Data Scientist - AI Data Scientist Freelancer

March 2023 – present

- Enhance product descriptions and recommendations through various recommender systems.
- Support development and evaluation of internal survey automation pipeline which improves the efficiency of data extract, transform, load (ETL), anomalous detection, weighting and exporting.
- Collaborate with business development consultants to develop innovative winning solutions leveraging data science, conduct technical innovation to ensure statistical rigor in econometrics and modeling projects, and give internal team technical training on analytics topics like recommender system and imbalance data modeling.
- Build a query generator trained on a corpus of historical expert queries with Generative Adversarial Network (GAN) architecture for a government client.

Education

Professional Degree in Artificial Intelligence

Dec 2022 | Stanford University

Master of Science in Statistics

May 2012 | The George Washington University

Bachelor of Science, Computer Science

2008 - 2012 | Stanford University | Stanford, CA

Skills

Python; Pandas; TensorFlow; Apache Hadoop; Amazon Redshift; AWS; NLTK; Apache Kafka; Git; Docker
